Date of birth

31-12-1993

Nationality

Ukrainian

Gender

Male

Website

<https://github.com/Fvtvl>

Bilingual (Ukrainian and English) highly motivated beginner in programming seeking to acquire experience as a Junior Front-End Developer in order to grow in this sphere due to big ambitions and analytical skills. Ready to work as a trainee at the beginning.

Unfortunately, I haven't had an opportunity to work in this field yet. I have started to study programming since the war in Ukraine began because I recognised the importance of being able to work remotely. So, being highly motivated I started my self-study. I also had an online course in HTML, CSS and JS. Although I didn't work in IT sphere, I managed to create some projects myself. I created a website based on the model from Figma with the help of HTML and CSS. I also have an experience of working with API on Vanilla JS. I started to learn React and work with it successfully. All my projects I push in Github, so you may get acquainted with them.

EDUCATION AND QUALIFICATIONS

Specialist in Law

Sep 2016

University of State Fiscal Service of Ukraine, Irpin
